Dear Authors,

Thanks for your interest in submitting a paper to JLISS.or JSMS. As we do not have fundings for the journals from 2022. Thus we have to charge the authors 700 USD (with 20% discount, which is 560 USD) since 2022, once the paper is accepted

Please let us know if you accept this policy or not. Then we will take the next step. Thank you.

Best regards,

Mincong

Please send me the revised article by september 15, 2022.

Reviewer 1: revision is required

the paper is interesting and well organized., I have learned something from reviewing your paper, however, I have to point out some rooms for improvement as follows:

- 1) please rewrite your abstract, now you use a very narrative style to describe the procedures of doing your research instead of providing a whole picture of your work. You should use a few sentences to describe:
  - the purpose of your study, why you did this research?
  - the method you used in this study, what method did you use to solve your research problem?
  - The results of your study, what have you got from this study?
  - the implication of your study, what are the practical and theoretical implications of your study? I mean how can the results be applied to theory and practices.
  - the values of your study, what's your contribution to theory or/practice?Through this way, readers (including me) could have a whole picture of your work.
- 2) In the introduction section, you should summarize the gaps of existing literature, then present you aim to do.
- 3) What is the limitation of your study? as well as the contribution. Please use more text to describe these two parts.
- 4) Please check the journal wellsite and format your paper carefully. Now it is not following the guideline at all.

Reviewer 2: revision is required

In this paper, the authors presented Measurement of Website Functionality and Perceived Usefulness in Increasing User Satisfaction Through The Role of Technology Readiness For E-Learning Users, which is interesting and within the scope of JSMS. I have learned something from reviewing this paper. However, I have some concerns for the authors to revise the paper:

- 1) Language is not good, you need to polish the whole paper after revision.
- 2) please provide more details of the method you used to make sure other people can replicate your method.
- 3) Literature support is not good , you should include more relevant studies to support your work, in addition, you should consider to refer to 1-2 papers in JSMS and JLISS.
