Deddy Purnomo Retno, Harmiyati:

We have reached a decision regarding your submission to Journal of Applied Engineering and Technological Science (JAETS), "THE CONSTRUCTION OF AFFORDABLE HOUSING IN DEVELOPING COUNTRIES: A SCIENTOMETRIC REVIEW".

Our decision is: Revisions Required

Reviewer A:

Recommendation: Revisions Required

Reviewer B:

Overall, this article has illustrated a strong relationship between research aims and objectives through methods, analysis techniques, discussion, and conclusions. However, more specific and detailed recommendations need to be added to the analysis results so that they can be used as guidelines for future researchers.

Recommendation: Accept Submission

Reviewer C:

Introduction : Provide a clear and concise definition of what is meant by "affordable housing" within the context of your study. This definition can help readers understand the specific focus of your research and how affordability is assessed in the context of housing.

Explain why it is crucial to study affordable housing in developing countries. Highlight the unique challenges, socio-economic factors, and urbanization trends that make this topic particularly

relevant in these regions. You can also discuss the potential impact of addressing affordable housing issues on the overall development and well-being of these countries.

Add literature review Section

Research Methods :

Describe how you collected the bibliographic data from Scopus in more detail. Explain any specific search queries or criteria used to retrieve relevant publications.

Elaborate on the specific scientometric techniques you employed within VOSviewers. For instance, when discussing keyword co-occurrence analysis, you can explain how this technique helps identify common themes or topics within the literature.

if your study involves multiple scientometric techniques, briefly introduce each one and explain its purpose in the analysis. Provide examples of what each technique can reveal about the literature

Result and Discussion :

Interpretation of Findings: Provide detailed interpretations of the results presented in each subsection. Explain the significance of the collaborative networks between countries, institutional collaborations, the impact of research outlets, and the contributions of authors in the context of AHC in developing countries.

Discuss the practical implications of your findings for researchers, policymakers, and practitioners involved in affordable housing construction. How can the collaborative networks and research areas identified in your study benefit the field? Are there specific strategies or areas of focus that should be considered based on your results?

Research Gaps: Identify any gaps or areas that are underrepresented in the existing literature. Are there aspects of AHC in developing countries that require more attention or research? This can help guide future research efforts.

Comparison with Previous Studies: If relevant, compare your findings with previous studies or literature reviews in the field. Are there consistencies or disparities in the research areas, institutions, or countries that have been highlighted in your study compared to earlier research?

Please change your figure in the article with high resolution

Dear Pak Luthfi,

I would like to thank you for reviewing my journal article submission titled **THE CONSTRUCTION OF AFFORDABLE HOUSING IN DEVELOPING COUNTRIES: A SCIENTOMETRIC REVIEW**. I have addressed the suggestions and comments from the reviewers as follows:

1. I have expanded the introduction to provide a concise overview defining affordable housing in developing countries and explaining its importance, as suggested.
2. Per the recommendation, I have added a literature review section covering recent related work in this area.
3. In the research methods section, I have clarified how the metadata was collected and the criteria (keywords) used, specifically in sections 3.1 and 3.2.
4. As you noted, this article presents the results of a scientometric analysis, where the relationship patterns emerged from analyzing the collected metadata as shown through the figures, tables, and descriptions in the relevant sections. It also covers gaps identified in the research.

I believe these changes have strengthened the paper and addressed the feedback from the reviewers. Please let me know if any additional information or modifications are needed. I appreciate you considering this revised version for publication in your journal.

Thank you again for your guidance throughout the review process. I look forward to hearing your decision.

Regards,

Dr. Deddy Purnomo Retno, ST., MT., GP.
