Fathurrahman F:

Thank you for submitting the manuscript, "The effects of the growth regulator paclobutrazol on physiological characteristics of rain tree (*Albizia saman* Jacq. Merr.)" to **Biodiversitas Journal** of Biological Diversity. With the online **journal** management system that we are using, you will be able to track its progress through the editorial process by logging in to the **journal** web site:

Submission URL: <https://smujo.id/biodiv/authorDashboard/submission/15004>
Username: fathurrahman_23

If you have any questions, please contact me. Thank you for considering this **journal** as a venue for your work.

Ahmad Dwi Setyawan

Reviewer B:

The study aimed to investigate the influence of colchicine on the F7 Renek long bean (*Vigna unguiculata* var. *sesquipedalis*), which has traditionally been used for food and medicinal purposes. The researchers applied colchicine treatment to the plant and observed changes in both phenotype and genotype. The results showed that colchicine indeed has the ability to induce polyploidy and mutations in the F7 Renek long bean, leading to alterations in its physical characteristics and chromosome size.

The authors of the manuscript did an admirable job of exploring the effects of colchicine on the plant. However, there were still several important points that needed to be addressed before publication. The details are listed below.

Review comments

Abstract

Generally well written, however some revisions have been suggested as tracked comment.

Introduction

Generally good, but can be improved.

Materials and Methods

For readability and easy understanding it could be placed under subheadings such as:

Description of planting material, experimental design, chromosome analysis among others as suitable for the study.

Results and Discussion

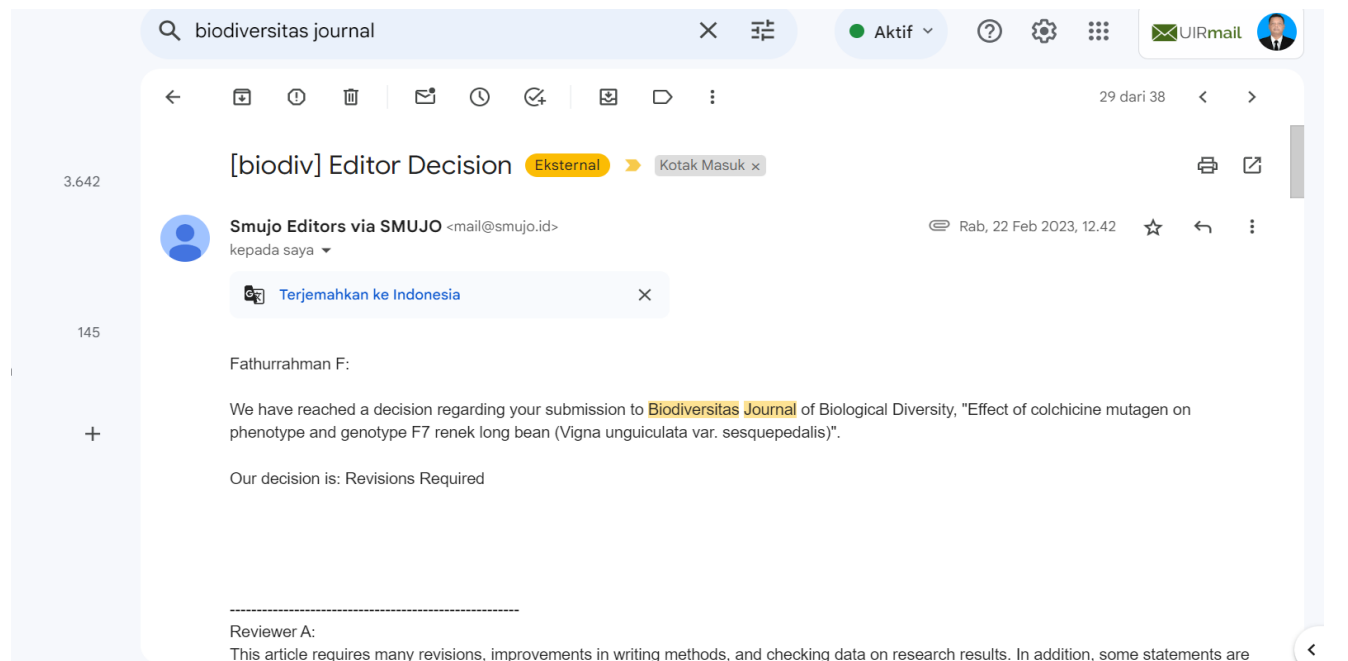

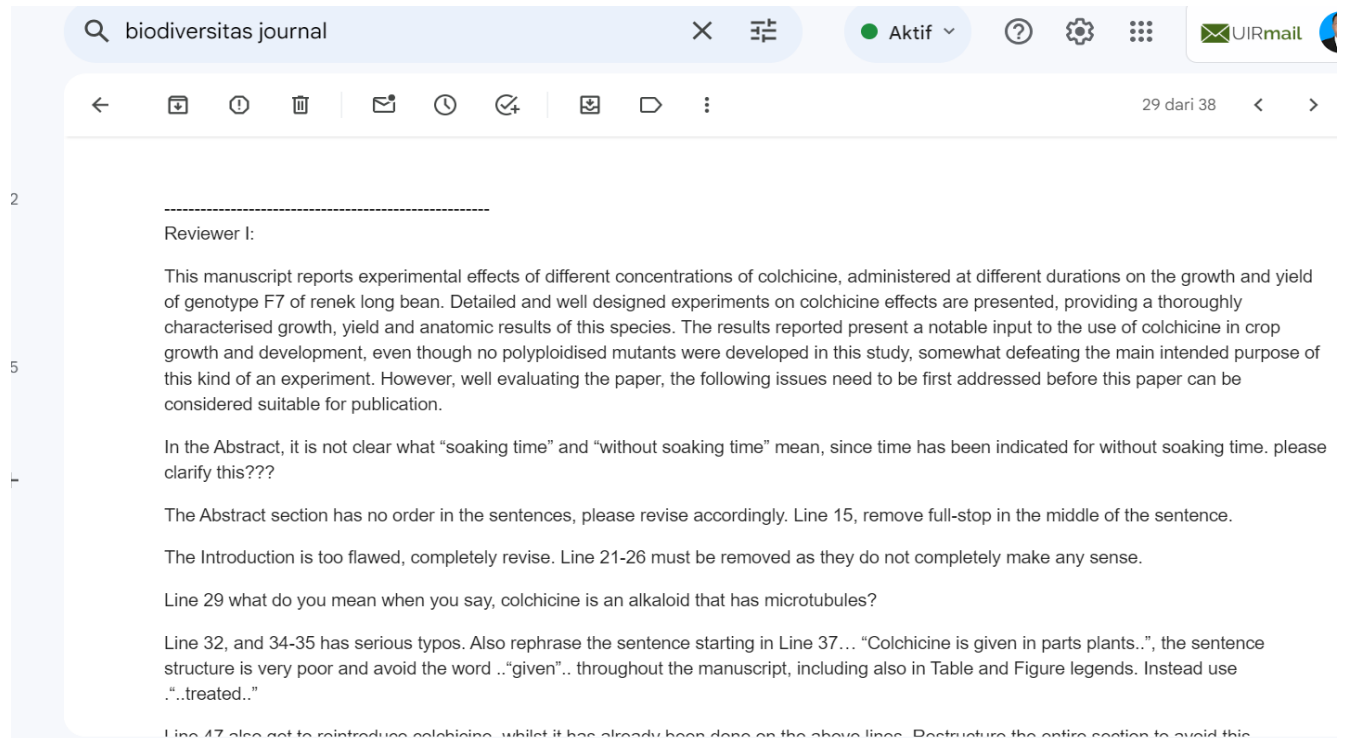

In several parts, the meaning of sentences not clear. This section should be greatly be improved.

Some references are needed to be provided to support findings.

Some tracked changes have been made for consideration.

Thank you.
