Dear Dr. Annisa Mardatillah,

A short note to thank you very much for your review of the following manuscript: Entrepreneurial Orientation: Insights from a Pilot Study on Small and Medium-Sized Enterprises. We greatly appreciate your time and effort for Scientific Papers of the University of Pardubice, Series D: Faculty of Economics and Administration.

Kind regards,

Editorial Office

Dear Dr. Annisa Mardatillah,

We would like to kindly invite you to review the following manuscript for Journal Scientific Papers of the University of P: of Economics and Administration.

Title: Entrepreneurial Orientation: Insights from a Pilot Study on Small and Medium-Sized Enterprises

Abstract: This article presents the outcomes of an empirical assessment that aimed to assess the feasibility of a planne necessary changes to enhance the main study's design. The assessment had four goals: identifying the research samg instrument, testing the means of disseminating the questionnaire, and performing basic statistics to inform the main stu to the limited published research on pilot studies and offers valuable insights into the process. A low response rate high respondents, and suggested ways to mitigate this risk. The questionnaire distribution was deemed inefficient, and an a proposed. The small research sample limits the generalizability of the results, but the aim to assess the research meth learned was achieved.

Keywords: Small And Medium-Sized Enterprises; Entrepreneurial Orientation; Pilot Testing; Surveys

We would be pleased if you review the manuscript within 14 days. However, if you do not have time, please contact us following link to accept or decline this review request: <https://editorial.upce.cz/reviews/submission/1718/c82e914aeb8d>

This study can be further pursued, taking into account the significant corrections (major revision) outlined in the attached article's reviewer comments

Abstract :Please provide information about the research findings, including details about the participants and their numbers, as well as the methodology used to collect data.

In the introduction, it is crucial to include a feasibility study from prior research conducted within the last 10 years as a reference point for addressing the current research problem.

The research is currently lacking a stated hypothesis, which is crucial. Furthermore, it should be grounded in existing theories. The time span lacking coverage in this literature review is quite extensive. It would be advisable to incorporate theories that pertain to the last decade, while also considering the inclusion of earlier theories.

The explanation of the analytical methods employed needs to be provided. Certainly, explaining the research sampling technique used and the reasons for its choice based on theory involves providing a detailed account of how the chosen sampling method aligns with the theoretical framework and objectives of the study.

The tests for validity and reliability have not been clarified.

The research findings should offer more intricate details in addressing the research hypothesis and the research questions posed. The discussion of the research results remains too broad to comprehend in a more specific and profound manner.

Isolate the discussion from the conclusions.

The peer review process is a fundamental part of research publishing. It's a way of ensuring only articles of the highest quality, which describe sound research methods and results, are published. We understand that you have many demands on your time. Therefore, we offer reviewers who provide comprehensive comments within 14 days a discount voucher code for 40 EUR (1100 CZK) of future article processing charges. The vouchers are valid for up to 2 years and issued to reviewers before final decision (accept or reject) by the editor.
