

ANALISIS KINERJA PENDAMPING DESA DI DESA TOPANG KECAMATAN RANGSANG KABUPATEN KEPULAUAN MERANTI

ABSTRAK

Ardy Suhandi

Kata kunci : Kinerja, Pendamping Desa;

Penelitian ini bertujuan untuk mengetahui dan menjelaskan kinerja pendamping desa di Desa Topang Kecamatan Rangsang Kabupaten Kepulauan Meranti. Teknik pengumpulan data yang digunakan terdiri dari, data primer dikumpulkan dengan menggunakan teknik daftar wawancara dan data sekunder yang dikumpulkan dengan menggunakan teknik observasi serta dokumentasi. Sementara teknik analisa data yang dipergunakan adalah metode deskriptif. Dimana metode deskriptif untuk menggambarkan secara utuh kenyataan tentang kinerja pendamping desa di Desa Topang Kecamatan Rangsang Kabupaten Kepulauan Meranti. Setelah data dikumpulkan, lalu dikelompokkan selanjutnya dipersentasikan untuk dianalisis secara deskriptif sesuai dengan penarikan suatu kesimpulan. Adapun dalam hasil penelitian yang dilakukan peneliti dengan judul “Analisis Kinerja Pendamping Desa Di Desa Topang Kecamatan Rangsang Kabupaten Kepulauan Meranti” dengan indikator variabel kualitas, kuantitas, waktu, dan kerjasama, dapat dikategorikan cukup baik. Faktor penghambat kinerja pendamping desa yaitu transportasi menuju desa topang mahal dan tidak ada tempat menginap khusus di desa topang untuk pendamping desa. Dengan demikian Analisis Kinerja Pendamping Desa Di Desa Topang Kecamatan Rangsang Kabupaten Kepulauan Meranti telah terlaksana dengan cukup baik meskipun belum optimal, dengan harapan ada perbaikan untuk kedepannya guna mencapai visi dan misi Pemerintah Desa Topang Kecamatan Rangsang Kabupaten Kepulauan Meranti.

**THE ANALYSIS OF THE PERFORMANCE OF VILLAGE ASSISTANTS
IN TOPANG VILLAGE RANGSANG SUBDISTRICT
MERANTI ISLAND REGENCY**

ABSTRACT

Ardy Suhandi

Keywords: Performance, Village Assistants;

The research was to know and explain the performance of village assistants in Topang village Rangsang subdistrict Meranti island regency. The researcher used some data collection technique, such as primary data which was collected by using a list of interviews and secondary data which was collected by using observation and documentation. The data analysis technique was used is descriptive method. Where the descriptive method was used to describe the reality of the performance of village assistants in Topang village Rangsang subdistrict Meranti island regency. After the data was collected, then grouped to be presented for analysing descriptively in accordance with the conclusion. The result of research was conducted by researcher entitle “The analysis of the performance of village assistants in Topang village Rangsang subdistrict Meranti island regency” with the indicator variable quality, quantity, time, and cooperation, can be categorized good enough. The in habiting factor of village facilitator performance is that transportation to the village of Topang is expensive and there is not special place to stay in the village of Topang for village facilitators. Thus an analysis of the performance of village assistants in Topang village Rangsang subdistrict Meranti island regency had been done well, although it had not been optimal. The researcher hope that there will be improvement in the future in order to achieve the vision and mission of Topang village government Rangsang subdistrict Meranti island regency.
