

Pengembangan Lembar Kerja Peserta Didik (LKPD) IPA Terintegrasi Imtaq pada  
Materi Pokok Sistem Ekskresi  
untuk Siswa Kelas VIII SMP/MTs

**ABSTRAK**

Penelitian ini bertujuan menghasilkan lembar kerja peserta didik terintegrasi Imtaq pada materi pokok sistem ekskresi yang layak digunakan untuk kegiatan belajar siswa kelas VIII SMP/MTs. Penelitian ini merupakan penelitian pengembangan (*research and development*). Penelitian ini menggunakan model pengembangan ADDIE. Pengembangan lembar kerja peserta didik dilakukan dari tahap analisis sampai tahap pengembangan. Penentuan sampel menggunakan teknik *purpose sampling*. Berdasarkan teknik tersebut, diperoleh 30 peserta didik. Sebelum diujicobakan, lembar kerja peserta didik terlebih dahulu melalui tahap validasi oleh ahli pembelajaran, ahli materi, ahli imtaq dan guru mata pelajaran IPA. Teknik analisis data menggunakan deskriptif data kuantitatif. Hasil penelitian ini adalah berupa produk lembar kerja peserta didik terintegrasi Imtaq pada materi pokok sistem ekskresi yang dikemas dalam bentuk cetak. Hasil validasi ahli pembelajaran menunjukkan bahwa lembar kerja peserta didik termasuk kategori sangat valid dengan rata-rata skor 100%. Hasil validasi ahli materi menunjukkan bahwa lembar kerja peserta didik termasuk kategori sangat valid dengan rata-rata skor 91,67% dan hasil validasi oleh ahli imtaq menunjukkan bahwa lembar kerja peserta didik termasuk kategori sangat valid dengan rata-rata skor 100%. Guru mata pelajaran IPA menunjukkan bahwa lembar kerja peserta didik termasuk kategori sangat valid dengan rata-rata skor 98,78%. Penilaian oleh peserta didik mendapatkan persentase sebesar 95,42%. Berdasarkan hasil validasi dari para ahli diperoleh produk berupa lembar kerja peserta didik terintegrasi Imtaq pada materi pokok sistem ekskresi sangat valid untuk digunakan dalam kegiatan pembelajaran IPA kelas VIII SMP/ MTs.

**ABSTRAK**

This research is aimed to produce activity sheet of Imtaq's integrated learners on the subject matter of excretion system that is suitable for the learning activity of VIII students of SMP / MTs. This research is a research development (research and development). This research uses ADDIE development model. Development of activity sheet of learners is done from the stage of analysis to the development stage. Determination of sample using purposive sampling technique. Based on the technique, obtained 30 students. Before the test, the activity sheet of the learners first through the validation stage by the learning expert, the material expert, the imtaq expert and the science subject teacher. Data analysis techniques using descriptive quantitative data. The result of this research is in the form of product activity sheet of Imtaq's integrated learners on the subject matter of excretion system which is packed in printed form. The result of the validation of the instructional expert indicates that the activity sheet of the learner belongs to a very valid category with an average score of 100%. Expert material validation results show that the activity sheet of the learners is very decent category with the average score of 91.67% and the validation result by the imtaq expert shows that the activity sheet of the learners is very valid category with the average score of 100%. Teachers of science subjects indicate that the activity sheet of the learners is included in a very valid category with an average score of 98,78%. Assessment by learners get a percentage of 95,42%. Based on the results of validation from the experts obtained the product in the form of activity sheet integrated learners Imtaq on the subject matter of excretion system is very valid for use in science learning activities class VIII SMP / MTs.
