BAB I PENDAHULUAN .................................................. 1
A. Latar Belakang Masalah ......................................... 1
B. Identifikasi Masalah ........................................... 6
C. Pembatasan Masalah ............................................. 6
D. Perumusan Masalah Masalah ..................................... 7
E. Tujuan Penelitian ............................................... 7
F. Manfaat Penelitian ............................................. 7

BAB II KAJIAN PUSTAKA .............................................. 9
A. Landasan Teori .................................................. 9
  1. Hakekat Power Otot Tungkai ................................ 9
     a. Pengertian Power Otot Tungkai .......................... 9
     b. Batasan Otot Tungkai .................................. 10
     c. Faktor-faktor Yang Mempengaruhi Power Otot Tungkai . 11
  2. Hakekat Tendangan Sabit ........................................ 12
     a. Pengertian Tendangan Sabit ............................. 12
     b. Teknik Dasar Tendangan Sabit ........................... 13
     c. Sarana dan Prasarana Pencak Silat ..................... 14
B. Kerangka Pemikiran ............................................. 15
C. Hipotesis ........................................................................................................ 16

BAB III METODOLOGI PENELITIAN ............................................. 17
A. Jenis Penelitian .............................................................................................. 17
B. Populasi dan Sampel ...................................................................................... 17
C. Definisi Operasional ...................................................................................... 18
D. Pengembangan Instrumen Penelitian ............................................................. 18
E. Teknik Pengumpulan Data ............................................................................ 21
F. Teknik Analisis Data ....................................................................................... 22

BAB IV PENGELOLAAN DATA ......................................................... 23
A. Deskripsi Data ............................................................................................... 23
  1. Deskripsi *Power* Otot Tungkai ................................................................. 23
  2. Deskripsi Hasil Tendangan Sabit ................................................................. 24
B. Analisis Data ................................................................................................. 26
C. Pembahasan ................................................................................................. 27

BAB V PENUTUP ..................................................................................... 29
A. Kesimpulan .................................................................................................... 29
B. Saran ............................................................................................................ 29

DAFTAR PUSTAKA ....................................................................................... 30
